

Wsl Deployment

Project Category: B1AI DEVOP1

Author: Roni Fernandes Dias / François LANGE

Date: June 23, 2026

Table of Contents

Storage Symlinks 3

Docker Socket Configurations 3

WSL Deployment Procedure

Setting up network and storage bounds inside Windows Subsystem for Linux (WSL 2).

Storage Symlinks

To easily work between Windows files and Linux containers:

```
ln -sf /mnt/c/Users/$USER/Documents/DEVOP1/antigravity/DEVOP1 ~/devop1
```

Docker Socket Configurations

Allow communication between host processes and containers via `docker` group allocation.
