Environment Configuration Guide

This document describes the environment variables required for running the project.

Variable Definitions

- ``PORT_OFFSET``: Offset applied to host ports to prevent collisions.
- ``ENABLE_MAIL``, ``ENABLE_DISCORD``, ``ENABLE_TEAMS``: Alerts toggles (``true`` or ``false``).
- ``EMAIL_USER``, ``EMAIL_PASS``: SMTP server login credentials.
- ``DISCORD_WEBHOOK_URL``, ``TEAMS_WEBHOOK_URL``: Targets for channel notifications.

> [!WARNING]

> Never check real passwords into Git! Place them only in your local ``env`` file.
