Core System Goals 3

Project Description: Antigravity DEVOP1

This project represents the Proof of Concept (PoC) for an automated, high-availability financial tracking DevOps pipeline named **Project Antigravity (DEVOP1)**.

Core System Goals

- **Telemetry Ingestion**: Scrapes and stores hourly commodity rates (XAU Gold) from financial services APIs.
- **Orchestration**: Operates a containerized multi-service stack (MySQL, Airflow, Zabbix Server, Flask, Jenkins).
- **Mixed VM Deployments**: Provides cross-platform deployment matrices (WSL, Hyper-V, VirtualBox).
