Disaster Recovery Plan (DRP)

This plan governs operations during host failures, data corruption, or infrastructure crash events.

Recovery Time Objectives (RTO)

- **MySQL Database**: < 10 Minutes.
- **Airflow Scheduler**: < 5 Minutes.

Failover Action Plan

1. **Host Crash**: Launch a new WSL instance or VM.
2. **Clone repo**: Fetch the latest code from Git.
3. **Restore DB**: Load the latest SQL backup using:

```
gunzip -c db_backup_latest.sql.gz | docker exec -i devop1-mysql mysql -u root -pyour_db_password_here
```
4. **Boot stack**: Run ``docker compose up -d``.
